#### Detailed Rationale

Crisil Ratings has continued its ratings on the bank facilities of Asian Energy Services Limited (AESL; part of the Asian group) on '**Rating Watch with Developing Implications**'.

Crisil Ratings had placed the ratings on Watch with Developing Implications on September 09, 2025, following the announcement made by AESL regarding the proposed scheme of merger of Oilmax Energy Private Limited (OEPL, the parent of AESL) into AESL. While AESL has received board and stock exchange approval. National Company Law Tribunal (NCLT) ordered a meeting of shareholders and final order is pending. Crisil Ratings will continue to monitor the progress of the merger and will resolve the watch with appropriate rating action post-completion of the same and upon gaining clarity on OEPL's performance.

The ratings continue to reflect AESL's long standing presence and technical capabilities, diversified revenue stream and comfortable financial risk profile. These strengths are partially offset by working capital intensive nature of operations and susceptibility of the AESL's performance to change in government regulations

#### Key Rating Drivers - Strengths

##### **Longstanding presence, strong technical capabilities:**

Asian group being a subsidiary of OEPL benefits from the experience of promoter Mr. Kapil Garg who has an experience of over three decades in the industry. This industry experience has led to strong technical capabilities and established client base.

The group has been dealing with reputed players like Gail India Ltd, ONGC Ltd, Oil India Ltd, Vedanta Ltd, Heavy Engineering Corporation, Singareni Coalfield Ltd, Eastern Coalfield Ltd. Strong technical capabilities has led to a

compounded annual growth of nearly 62% for the past three fiscal years ending fiscal 2025. Group has already clocked in a revenue of Rs 453 Cr for the nine months ended December 31, 2025. Business risk profile of the group is estimated to remain comfortable over the medium term on account of healthy unexecuted order book of Rs 1874 Cr as on December 31, 2025.

#### **Diversified revenue base:**

AESL was previously heavily dependent on seismic segment and had started its EPC operations fiscal 2021 onwards and later on added operations and maintenance segment. Group has also acquired Kuiper group in H1 of fiscal 2026 which is engaged in providing man-power services for the energy sector in Middle East.

This diversification in revenue insulates the group from downturn in anyone segment and helps to increase its scale on a steady basis as reflected in a year till date growth of 81% in topline for the nine months ended December 31, 2025, as against same time last year.

#### **Comfortable capital structure:**

Capital structure of the group remains comfortable marked by a networth of Rs 443 Cr as on September 30, 2025. Moderate reliance on external debt has led to a comfortable capital structure marked by a gearing of 0.24 times as on September 30, 2025, despite debt funded capex and acquisition done by the group in H1 of fiscal 2026.

Debt protection metrics also remain comfortable with interest coverage ratio at 7.57 times for the H1 of fiscal year 2026.

#### **Key Rating Drivers - Weaknesses**

##### **Working capital intensive nature of operations:**

AESL continues to have working capital intensive nature of operations as reflected in 293 Gross Current Asset (GCA) Days as on March 31, 2025. High GCA emanates from high debtor days which stood at 284 days as on September 30, 2025. Debtor days are estimated to reduce and remain in the range of 170-190 days by March 31, 2026. Inventory days have reduced from 79 days as on March 31, 2025, to 59 days as on September 30, 2025 and are estimated to reduce further by March 2026. Working capital requirements are met by creditors and bank lines.

##### **Government Regulations-Policy:**

AESL generates majority of its revenue from the oil and gas segment and is susceptible to an changes in the industry. Changes in the geopolitical landscape and government policies particularly to the environment and safety issues can materially impact the business risk profile of the group.

##### **Liquidity** Adequate

Liquidity position of the company remains adequate and is marked by estimated net cash accruals over Rs 84 Cr as against repayment obligations of Rs 24-25 Cr fiscal 2027 onwards. Bank limit utilization is moderate and averaged at 56% for fund-based limits and 76.25% for non-fund-based limits for the past twelve months ended February 2026. Group also has cash and cash equivalents of Rs 157 Cr as on March 2026 of which Rs 92 Cr is free from any encumbrance.

#### **Rating sensitivity factors**

##### **Upward factors:**

- Sustained increase in the scale of operations of the group leading to net cash accruals over Rs 80 Cr on a sustained basis
- Sustained improvement in working capital cycle particularly driven by improvement in debtor days.
- Sustenance of financial risk profile

##### **Downward factors:**

- Moderation in scale or operating margins leading to net cash accruals below Rs 50 Cr on a sustained basis.
- Further stretch in receivable days leading to higher-than-expected gross current asset days.
- Higher than expected debt funded capex leading to moderation in financial risk profile.
