CyberTech Reports Q2FY27 Revenue ₹ 780.3 million; up 16.9% YoY

Mumbai, India – 22nd October, 2026: CyberTech Systems and Software Ltd. (BSE: 532173; NSE: CYBERTECH), a CMMI Level 3 next-generation Enterprise Cloud Transformations provider, announced today its financial results for the **second quarter and half year FY27** ended on 30th September 2026.

Commenting on the results, Mr. Vish Tadimety, CEO and Founder, CyberTech, stated: "The second quarter built steadily on the first. Operating revenue was INR 733.0 million, up 24.7% year-over-year and 7.1% over the previous quarter, and total revenue was INR 780.3 million, up 16.9% year-over-year. As client demand increased, we expanded delivery through a mix of our own engineers, specialist partners, and AI-assisted delivery, and our operating revenue grew at a faster pace than our delivery costs. Profit after tax for the quarter was INR 86.8 million, reflecting lower other income compared with the same period last year.

For the first half, operating revenue increased 21.2% to INR 1,417.4 million and profit after tax increased 7.9% to INR 181.5 million. These results indicate that the areas we have chosen to invest in, namely specialized engineering, AI-enabled delivery, and cloud, are contributing to the operating performance of the business, and we will continue to build on them selectively.

Geospatial remains central to our business. Our standing as an Esri Platinum Partner continues to support client interest in our Managed ArcGIS Cloud Services, and we are applying GeoAI in engagements where location data informs operational decisions.

Our SAP practice continues to support enterprises moving to S/4HANA and building on the Business Technology Platform (BTP). Our collaboration with the SAP Migration Factory helps clients plan and execute their transitions to the SAP cloud in a structured way.

As AI changes the economics of technology services, we believe the advantage lies with firms that pair specialized expertise with AI in delivery, rather than those that scale primarily through headcount. That is the model we have been building at CyberTech, and our partnerships with AWS and Microsoft Azure keep our work aligned with the platforms our clients rely on.

We will continue to manage the business with discipline, both in our operations and in how we deploy capital. My thanks to our Board of Directors and our shareholders for their support, and to our clients and our team for their trust and commitment."
