

Meta Doubles Down on CleanMax

Executive Summary

CleanMax's 837 MW renewable energy deal with Meta. Taking their cumulative partnership to ~900 MW is a landmark transaction that validates India's largest pure-play C&I renewable platform at hyperscaler scale. Underpinned by CRISIL-projected 40% C&I capacity growth to FY28, structural SBTi-driven pricing power, and a 74% repeat-customer base. View - Positive.

About the company

Clean Max Enviro Energy Solutions Limited is India's largest pure-play C&I renewable energy company, with over 15 years of operations. The company's contracted portfolio reached 5.7 GW in FY2025-26, serving 588 customers across technology, data centres, AI infrastructure, manufacturing, and industrial sectors

The Deal

CleanMax and Meta Platforms have announced an 837 MW renewable energy partnership (new solar and wind capacity across Rajasthan and Karnataka) taking their cumulative tie-up to over 900 MW. Meta will purchase 100% of the environmental attributes from these projects to match its electricity use with clean energy and address value chain emissions in the region. This is not a new relationship but a compounding one:

Year	Capacity	What it Established
2021	32 MW	First C&I contract with Meta bespoke renewable supply; relationship foundation laid
2022	33.8 MW	Second tranche; demonstrated delivery quality, deepened operational trust
2026	837 MW	Transformational scale-up; solar + wind across Karnataka & Rajasthan; 100% environmental attribute transfer

The progression from 32 MW to 837 MW across five years tells a clear story: CleanMax built trust through execution, and Meta responded by entrusting it with a GW-scale mandate.

Rationale:

AI Infrastructure & Data Centre Power Demand

CRISIL projects India's C&I renewable energy capacity to grow from ~40 GW by end-FY26 to 57 GW by FY28, driven by rising demand from data centres, corporate net-zero targets, and favourable open-access PPA tariffs versus grid power. Global technology companies require clean energy not only to power energy-intensive AI workloads but also to meet net-zero commitments and Science Based Targets initiative (SBTi) obligations. CleanMax is emerging as a preferred renewable energy partner for hyperscalers, as evidenced by its expanded partnership with Meta (~900 MW), Apple (~150 MW), and Google (~125 MW), positioning it to benefit from a multi-decade AI-driven energy demand cycle.

Global Sustainability Commitments Create Pricing Power

Global corporations' SBTi and Scope 2/3 commitments are turning renewable energy procurement into a strategic necessity, enabling developers like CleanMax to command premium pricing. The 837 MW Meta hybrid (solar-wind) contract demonstrates this, with tariffs of INR 4.25–5.50/kWh above INR 2.50–3.50/kWh for typical solar driven by three factors: round-the-clock hybrid supply, full REC transfer to meet green obligations, and long-term reliability from a highly rated developer. At ~30% CUF, the project generates ~2,200 MU annually, yielding ~INR 1,045 crore revenue and ~INR 872 crore EBITDA (83.5% margin), a 67% uplift over FY26 EBITDA. Over 25 years, it represents ~INR 26,000 crore revenue and ~INR 21,700 crore EBITDA. This highlights CleanMax's structural pricing moat, which is expected to strengthen as global net-zero mandates expand demand for high-quality renewable supply.

Sticky Customer Base Creates Long-Term Cash Flow Visibility

CleanMax benefits from a highly sticky customer base, with approximately 74% of business originating from repeat customers. Long-duration PPAs, captive structures, and integrated renewable solutions create significant switching costs and encourage customers to expand renewable procurement over time. This is demonstrated by Meta's relationship expanding from ~65 MW to over 900 MW. Such customer stickiness enhances revenue visibility, lowers customer acquisition costs, and supports sustainable growth.

I submit that no material disciplinary action has been taken on DCFPL and its associates (Group Companies) by any Regulatory Authority impacting Equity Research Analysis activities.

DCFPL prohibits its associate, analysts, persons reporting to analysts and their relatives from maintaining a financial interest in the securities or derivatives of any companies that the analyst covers.

DCFPL or its associates (Group Companies) collectively or its research analyst, or relatives do not hold any financial interest/beneficial ownership of more than 1% (at the end of the month immediately preceding the date of publication of the research report) in the company covered by Analyst and has not been engaged in market making activity of the company covered by research analyst.

It is confirmed that, I, **Neel Mehta** Research Analysts of this report have not received any compensation from the companies mentioned in the report in the preceding twelve months. Compensation of our Research Analysts is not based on any specific brokerage service transactions.

DCFPL or its Associates (Group Companies) have not managed or co-managed public offering of securities for the subject company in the past twelve months.

DCFPL or its associates (Group Companies) collectively or its research analyst, or relatives might have received any commission/compensation from the companies mentioned in the report during the period preceding twelve months from the date of this report for services in respect of brokerage services or specific transaction or for products and services other than brokerage services.

DCFPL or its associates (Group Companies) collectively or its research analyst, or relatives might have received any commission/compensation from the companies mentioned in the report during the period preceding twelve months from the date of this report other than investment banking or merchant banking or brokerage services from the subject company

DCFPL encourages the practice of giving independent opinion in research report preparation by the analyst and thus strives to minimize the conflict in preparation of research report. DCFPL or its analysts did not receive any compensation or other benefits from the companies mentioned in the report or third party in connection with preparation of the research report. Accordingly, neither DCFPL nor Research Analysts his associate or his relative, have any material conflict of interest at the time of publication of this report.

It is confirmed that **Neel Mehta**, Research Analyst do not serve as an officer, director or employee of the companies mentioned in the report.

DCFPL or its associates (Group Companies) or its research analyst has may been engaged in market making activity for the subject company.

The securities quoted are for illustration only and are not recommendatory.

DCFPL (Research Entity) and its research analysts uses Artificial Intelligence tools.

DCFPL and or its Research analysts shall be solely responsible for the security, confidentiality and integrity of the client data, use of any other information or data for research services, research services based on output of Artificial Intelligence tools and compliance with any law for the time being in force.

This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other Jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject DCFPL and affiliates to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform them of and to observe such restrictions.

Investment in securities are subject to market risks, read all the documents carefully before investing.

Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors.
