Company Overview

Company Overview

- Systango Technologies Limited commenced operations in 2007, is a digital engineering services company with nearly two decades of experience in building scalable, AI-powered, and cloud-native solutions.
- It is led by experienced promoters Nilesh Rathi and Vinita Rathi, each with over 20 years of global technology and entrepreneurial experience, supported by a skilled management team driving innovation-led growth.
- Headquartered in Indore, Madhya Pradesh and with office presence in UK and USA, Systango serves a diversified client base in 10+ countries across North America, Europe, and Asia-Pacific.
- Providing end-to-end digital engineering services across AI/ML, Data Engineering, Cloud Computing & Infrastructure, Blockchain, DeFi, and App Development.
- Systango is actively exploring strategic acquisition opportunities that align with its long-term vision and operational synergies to further strengthen its global presence and technology capabilities.
- In 2025-26, Systango entered into a Strategic Alliance with Alibaba Cloud to accelerate AI-driven Cloud adoption across markets.
- Systango follows an outcome-oriented global delivery model, blending in-house customisation with offshore efficiency to ensure faster time-to-market, scalability, and cost optimisation.

Board of Directors

Ms. Vinita Rathi
Managing Director & CEO

A technology entrepreneur with over 17 years of experience in software engineering, product development, and digital transformation. She has been pivotal in driving Systango's growth into a global digital engineering company with operations across India, UK, and US. Under her leadership, the company has expanded into AI, Blockchain, Cloud, and Data Engineering, building a reputation for innovation and excellence.

Mr. Nilesh Rathi
Executive Director and Chief Financial Officer

A seasoned entrepreneur and business leader with over 20 years of experience in technology consulting, operations, and strategic management. He has been instrumental in guiding Systango's overall business strategy, governance, and global expansion, ensuring sustainable and innovation-driven growth. Under his leadership, the company has strengthened its position as a trusted digital transformation partner, delivering scalable technology solutions across AI, Cloud, and Blockchain ecosystems.

Ms. Sarita Devi Khandelwal
Non-Executive Director

She holds a Master of Arts (M.A.) degree and brings over 12 years of professional experience. She plays an active role in providing oversight and guidance around people operations, reinforcing Systango's commitment to strong corporate governance and environment. Her independent perspective contribute to informed decision-making and a balanced, long-term direction for the company.

Mr. Narender Tulsidas Kabra
Independent Director

A seasoned banker with over 34 years of experience in Indian banking and financial services, with deep expertise in credit business, risk management, information technology, and human resources. He has held senior leadership roles at the Bank of Maharashtra, where he headed key verticals and led several digital and credit transformation initiatives. Narender also serves as an Independent Director on the boards of Brand Concepts Ltd. and Systango Technologies Ltd., bringing extensive experience in corporate governance, strategy, and financial oversight.

Mr. Vikas Jain
Independent Director

He holds a Bachelor of Science degree from Devi Ahilya University, Indore, Madhya Pradesh (1998), and brings over 16 years of experience in UI web development, implementation, and support. He also serves on the boards of Fivelements eHealing Private Limited and Visionpark Machineries Private Limited.

Key Managerial Personnel

Mr. Bhuvan Dani
Sr. Director, Engineering

A seasoned engineering professional with over 18 years of experience in software development and resource management. He leads Systango's resource management group, ensuring efficient team utilisation, delivery excellence, and scalable project execution across multiple verticals.

Mr. Gagan Bahety
Sr. Director, Engineering

An experienced technology leader with 14+ years of experience across FinTech, Telephony, and PropTech. He plays a critical role in engineering leadership, driving delivery quality, and scaling product innovation across multiple sectors.

Mr. Arpit Khandelwal
SVP Engineering

An engineering leader with 18+ years of experience in complex technical architectures, governance, and internet-scale application development. He is a key driver of Systango's Blockchain Practice, spearheading innovation and technology adoption across global client engagements.

Mr. Pallav Boonlia
Sr. Director, Engineering

With 16+ years of experience, Pallav specialises in DevOps, Data Engineering, and software delivery excellence. He has a proven track record of building high-quality, scalable products and fostering innovation to achieve business goals, while championing Systango's DevOps and Data Practice.

Key Managerial Personnel

Mr. Alex Sewell

Director – Sales (USA/EMEA)

A global sales leader with 30 years of international experience in enterprise sales, business development, and market expansion. Based in the UK, Alex focuses on bringing new technologies to market and accelerating Systango's growth across the USA and EMEA regions.

Mr. Mark Hunt

Vice President (Sales) - Americas

A global sales leader with 30 years of international experience in enterprise sales, business development, and market expansion. Based in the UK, Alex focuses on bringing new technologies to market and accelerating Systango's growth across the USA and EMEA regions.

Anshuman Thakur

Head of Engagement

Anshuman Thakur, Head of Engagement, brings 15+ years of experience in HR, employee engagement, and training. He leads initiatives focused on enhancing employee experience, strengthening retention, and fostering organisational growth.

Vaidehi Bhargava

Head of HR Operations

Vaidehi Bhargava is the driving force behind Systango's HR Operations. With a focus on operational excellence, Vaidehi ensures that every employee's journey is seamless and efficient. Known for her attention to detail and commitment to compliance, she is dedicated to creating a structured and supportive work environment that drives success for both, our people and the organisation.

Abhishek Chhabra

Director - Corporate Finance and Strategy

A Chartered Accountant with 15+ years of experience across manufacturing and services industries. He leads M&A, FP&A, business valuation, and strategic initiatives, partnering with leadership to drive growth, profitability, and shareholder value.

Strategic Advisors

Experienced business and technology leaders providing strategic guidance on revenue growth, go-to-market strategy, international expansion, technology innovation, AI, digital transformation, and leadership development.

Awards & Certifications

What Sets Us Apart

Core Model

We act as a digital engineering partner that designs, builds, and scales AI-powered, cloud-native platforms delivering measurable business value and long-term impact.

Value Proposition

We operate as an extension of our clients' product and platform teams, assembling cross-functional squads that drive innovation, solve complex challenges, and deliver results at speed and scale.

Outcome-Oriented Approach

We measure success through real-world outcomes enabling faster time-to-market, enhanced scalability, and significant cost efficiencies for our clients.

Focus

We specialise in transforming ideas and prototypes into production-grade digital systems, bridging the gap between proof-of-concept and enterprise-scale deployment.

Tangible Outcomes

We deliver AI-driven, cloud-native solutions that create measurable business impact from deploying new features within weeks to modernizing workloads on hyperscale cloud platforms.

Target Customers

We partner with high-growth startups, scale-ups, and global enterprises pursuing digital transformation, AI adoption, and platform modernization across industries and markets.

Business Overview

Technology Service Verticals

Generative AI & Machine Learning

Generative AI & Machine Learning

- Design and deployment of AI-driven solutions that automate processes, enhance decision-making, and unlock revenue opportunities.
- Offerings include AI discovery workshops, custom AI agents, LLM integration, algorithmic trading models, and intelligent document processing.
- Converts AI potential into measurable business outcomes for enterprises.

Our Work

AI-Powered Legal Ops Driving 30% Efficiency and 80% Faster Docs

Digital Transformation via AI & Portal Integration

Objective: The primary objective was to eliminate data silos within the Power Platform and CRM to create a connected ecosystem. This foundation would then be used to automate legal operations, improve client servicing with real-time visibility, and provide unified dashboard insights for better decision-making.

AI-Powered Grocery & Errands with 25% Faster Delivery

An AI-Powered Ethnic Grocery Platform with Smart Search

Objective: WeDeliver aimed to transform ethnic grocery shopping through AI-powered discovery and scalable delivery infrastructure.

- Ethnicity-aware product tagging and recommendations.
- Scalable architecture supporting regional expansion...
- Multi-app ecosystem for customers, vendors, and delivery partners.

GenAI Studio: Gateway to AI Development Services

Through GenAI Studio, workflow efficiency is improved and new ideas are quickly piloted using pre-built agents and components while maintaining security and governance standards.

Intake & Prioritise

Align goals, assess maturity /constraints, and prioritise the first viable use case.

Prototype Sprint

Dedicated pod creates a working prototype, clickable experience, and test plan on your stack.

Review & Enable

Review outcomes against baseline metrics, conduct security checks, and create a production plan.

Embed & Scale

Solution rollout, monitoring enablement, training, and support for long-term impact.

Speed & Efficiency

Ships solutions in weeks, not quarters (12-16 week schedule).

Integrated Model

Single, integrated cross-functional pod (Product, AI/ML, Engineering, DevOps) ensuring zero handoffs.

Governance by Design

Built-in access controls, audit logs, and clear go/no-go processes before launch.

Stack Alignment

Built on your cloud, models, and tools for faster approvals and seamless integration.

AI-Powered Products & Solutions Across Industry

AI-powered, scalable platforms address diverse business challenges from FinTech and trading automation to data analytics and learning management. These solutions demonstrate the ability to customise AI for specific industry use cases, ensuring faster ROI and measurable outcomes for clients.

AI-Powered Crypto Options Trading Platforms

AI-powered trading platform integrates blockchain security, predictive analytics, and automation to help traders identify opportunities and manage risks in real time. It enhances trading accuracy and decision-making speed while providing a customisable, white-label solution for FinTech clients and digital exchanges across the globe.

Generative Business Intelligence (BI)

Generative BI platform unifies diverse data sources, uncovers hidden patterns, and transforms complex information into actionable insights. Powered by predictive AI, it supports informed decision-making, accelerates go-to-market strategies, and enhances self-serve analytics for teams.

Learning Management Platform

Skill Up is a white-label LMS that enables organisations to deliver, track, and optimise training while reflecting their brand identity. From onboarding to leadership development, it supports personalised learning, fosters engagement, and ensures measurable performance outcomes.

Intelligent Document Processing

(IDP) solution automates information extraction from documents, helping businesses reduce manual effort, minimize errors, and enhance decision-making. Powered by AI, NLP, OCR, and Generative AI, it enables faster processing, greater accuracy, and secure deployment options.

Custom AI Agents

The custom AI agents go beyond chatbots, delivering intelligent, industry-specific, and data-driven interactions. Built on leading LLMs like GPT, Gemini, and Llama, these agents automate workflows, integrate with existing systems, and provide actionable insights enhancing customer satisfaction, reducing response times, and cutting operational costs.

Wealth Management Platform

The white-label wealth management platform streamlines investments through AI-driven automation, personalised insights, and smart reporting. It enables users to make informed decisions, optimise strategies, and achieve long-term goals, driving efficiency, scalability, and a competitive edge for financial institutions.

systango

Data Engineering & Cloud

Data Engineering

- Development of robust data pipelines and integration frameworks to unlock the full value of data.
- Services include real-time data integration, dashboards, visualisation, recommendation engines, and predictive analytics.
- Empowers businesses with faster insights, personalised experiences, and data-driven decisions.

Cloud & Platform Engineering

- Modernisation of IT infrastructure and platforms for scalability, reliability, and cost efficiency.
- Capabilities cover Infrastructure as Code (IaC), Site Reliability Engineering (SRE), DevOps automation, cloud-native architecture, and optimisation.
- Ensures faster delivery, reduced downtime, and improved ROI from cloud adoption.

Blockchain & Web3

Blockchain & Web3

- End-to-end solutions for building secure and scalable decentralised platforms.
- Expertise across DeFi ecosystems, asset tokenisation, NFT marketplaces, and Layer-2 scalability integrations.
- Helps enterprises create new digital assets, streamline transactions, and drive trust through transparency.

Our Work

Smarter DeFi Trading with AI and Verifiable Market Data

Next-Gen AI / DeFi Options Trading Platform

Objective: The objective was to build a unified, AI-powered DeFi trading platform that aggregates liquidity, ensures transparent and secure transactions through verifiable compute, and simplifies derivatives trading with an intuitive user experience.

ZK-Proven Blockchain Data Cuts Time-to-Insight by 30%:

Empowering Web3 Innovation

Objective: Space and Time (SxT) aimed to provide dApp developers with efficient, low-latency API access to preloaded blockchain data.

- A comprehensive dApp frontend.
- Next-gen architecture for a user-friendly interface.
- AI/ML insights and Chainlink integration.

Multi Channel Revenue Streams

Staff Augmentation

Charging for dedicated developer resources integrated into client teams.

Time & Materials / Project-Based Billing

Custom builds for clients, covering everything from prototyping to final deployment.

Managed & Maintenance Contracts

Recurring fees for ongoing support, infrastructure management, and SLA-backed services.

Solution Licensing

Revenue from proprietary products like intelligent document processors or their LMS (Swotter) and wealth-management tool (Shootih).

BaaS Offerings

Cloud-based blockchain platforms delivered and maintained as a service, often under a pay-as-you-go model.
