

Rating Rationale

July 17, 2026 | Mumbai

Ddev Plastiks Industries Limited

Ratings reaffirmed at 'Crisil A+ / Stable / Crisil A1+ '

Rating Action

Total Bank Loan Facilities Rated	Rs.759 Crore	Regulator Of Instrument
Long Term Rating	Crisil A+/Stable (Reaffirmed)	RBI
Short Term Rating	Crisil A1+ (Reaffirmed)	RBI

Note: None of the Directors on Crisil Ratings Limited's Board are members of rating committee and thus do not participate in discussion or assignment of any ratings. The Board of Directors also does not discuss any ratings at its meetings.

1 crore = 10 million

Refer to Annexure for Details of Instruments & Bank Facilities

Detailed Rationale

Crisil Ratings has reaffirmed its 'Crisil A+/Stable/Crisil A1+' ratings on the bank facilities of Ddev Plastiks Industries Limited (DPIL).

The ratings factor in the healthy business risk profile of the company, backed by growth in volume and better product mix, which should lend stability to the operating margin over the medium term. The ratings also factor in sustenance of the healthy financial risk profile and adequate liquidity, which is likely to improve further, in the absence of any debt obligation.

Crisil Ratings has also taken note of the company's announcement in January 2026, regarding its strategic diversification into battery energy storage systems (BESS), with plans to set up 5 GWh capacity in phases. The initiative will cater to a broad spectrum of end-markets, including utilities, commercial and industrial customers, residential applications, electric vehicle (EV) charging and battery swapping, grid and ancillary services, and telecom and data centres. The project entails investment of Rs 100–125 crore over the next 2–3 years and will likely be funded through internal accrual. The planned facility is expected to commercialise from fiscal 2028. Each gigawatt projected to generate revenue of Rs 800–900 crore per annum and earnings before interest, tax, depreciation and amortisation (Ebitda) margin of 6–8%, providing a meaningful growth avenue, enhancing business diversification, and strengthening the company's overall business risk profile.

DPIL's revenue grew by 13% to reach Rs 2,953 crore during fiscal 2026, driven by healthy demand from the domestic wires and cables industry, capacity additions, and robust export performance. Export revenue grew by nearly 30% during the year, led by volume growth of ~23%. Over the medium term, revenue from the existing business is projected to grow at a steady pace of 9–11%, supported by higher sales volume, improving product mix, and benefits from ongoing capex and capacity expansions, which should enhance capacity utilisation and strengthen market reach. Planned foray into BESS will also provide an additional growth avenue from fiscal 2028 onwards.

DPIL maintained an Ebitda margin of around 10.7% in fiscal 2026, despite significant volatility in polymer prices and elevated raw material cost, particularly during the second half of the year. Gross margin moderated marginally to 17.7% from 18.1% in fiscal 2025, amid fluctuations in raw material cost. Profitability continues to benefit from a progressively improving product mix, with high-margin polyethylene (PE) compounds contributing nearly 87% of total revenue, vis-à-vis 76% four years ago. Moreover, the cost-plus pricing mechanism provides a natural hedge against sharp fluctuation in raw material prices. Operating margin is likely to remain stable in fiscal 2027, notwithstanding volatility in raw material prices arising from an uncertain geopolitical environment. Lag in passing on the cost hikes to customers may also compress the spreads temporarily. The margin is projected to improve to 11.0–11.5% from fiscal 2028 onwards, supported by stabilisation of commodity prices, a favourable product mix, operating leverage benefits from scale expansion, and enhanced procurement efficiencies. While the BESS segment may fetch a relatively lower margin than the core business during the initial years, its contribution is likely to be outweighed by strategic benefits of diversification and scale, with consolidated Ebitda margin remaining only marginally below those of the existing business.

Capital structure remains strong, marked by borrowings of around Rs 223 crore and virtually no long-term debt as on March 31, 2026. Networth rose to ~Rs 1,013 crore from around Rs 835 crore a year earlier, supported by sustained profitability. DPIL is expected to incur capex of Rs 350–400 crore over the next 2–3 years, including investment towards the planned

BESS facility, along with capacity expansion and maintenance capex for the existing business. The entire capex is expected to be funded through internal accrual, thereby limiting any material dependence on external debt. Debt protection metrics were healthy, with debt-to-Ebitda below 0.8 time as on March 31, 2026, and estimated interest coverage of 11 times and net cash accrual to adjusted debt (NCA/AD) ratio of 90% for the fiscal. Leverage metrics should remain strong over the medium term, with gearing below 0.2 time and debt-to-Ebitda at comfortable levels in the absence of any significant debt-funded expansion. Interest coverage is likely to sustain above 10 times and NCA/AD over 90% over the medium term, underpinned by steady cash generation, prudent financial management, and a conservative capital structure.

Liquidity is likely to be aided by cash accrual of Rs 200–300 crore expected per fiscal, which should suffice to cover capex plans in the absence of any debt obligation over the medium term. DPIL had an unencumbered cash surplus of Rs 59 crore as on March 31, 2026. The company also had sanctioned bank limits of Rs 759 crore, utilised at an average of 31% during the 12 months ended April 30, 2026, providing sufficient cushion to address contingencies.

The ratings reflect the company's healthy market position, wide product range, established clientele and experienced management. The ratings also factor in the healthy and improving financial risk profile, backed by adequate cash accrual and a debt-free balance sheet.

These strengths are partially offset by exposure to intense competition in the compounds market, dependence on large players in the oil and gas industry for raw material, and volatility in raw material prices and foreign exchange (forex) rates. While the company does not have sizeable exports to the US, any indirect impact of the US tariffs will remain monitorable.

Analytical Approach

Crisil Ratings has considered the standalone business and financial risk profiles of DPIL.

Key Rating Drivers - Strengths

Healthy business risk profile, backed by extensive experience of the promoters, wide product range and strong clientele

DPIL is promoted by the Kolkata-based Surana family, which has been associated with the polymer compounds industry for over five decades. Over the years, they have diversified the product profile, developed a strong understanding of market dynamics, and built healthy relationships with suppliers and customers. Clientele includes large wire and cable companies such as KEI Industries Ltd, Havells India Ltd, Apar Industries Ltd and KEC International Ltd ('Crisil A1+'), as well as some key international manufacturers.

DPIL is the largest polymer compounder in India, with capacity of 233,400 tonne per annum (TPA) and market leadership in PE compounds, catering to the low, medium and high-voltage power cable industry. The company caters to a diversified clientele, with a vast range of products used for manufacturing building wires, control and instrumentation cables, insulation and jacketing of wires in the wire and cable industry, and in the packaging segment. Turnover stood at Rs 2,953 crore for fiscal 2026.

Prudent inventory management and strategic location of facilities

The company has manufacturing facilities on the east and west coasts of India (West Bengal, Daman and Silvassa). Strategic location of units provides logistic benefits for import of raw materials and export of finished products. Proximity to suppliers and ports facilitates tighter control over inventory. DPIL has increased its share of imports from the Middle East, where it gets an interest-free credit period. Volatility in prices of raw materials (crude oil derivatives) impacts operating profitability. However, prudent inventory management has shielded the business from any sharp fluctuation in raw material prices and helped sustain the operating margin.

Comfortable capital structure and healthy debt protection metrics

Networth rose to ~Rs 1,013 crore as on March 31, 2026, from around Rs 835 crore a year earlier, supported by stable profitability. Gearing was low at 0.20 time as on the same date, as the company has no term debt obligation, and the entire debt is in the form of working capital borrowing. DPIL is expected to incur capex of Rs 350–400 crore over the next 2–3 years, including investment towards the planned BESS facility, along with capacity expansion and maintenance capex for the existing business. The entire capex is expected to be funded through internal accrual, thereby limiting any material dependence on external debt. Hence, gearing is likely to remain below 0.20 time over the medium term. Debt protection metrics were healthy, with interest coverage and NCA/AD ratios estimated to be 11 times and 90%, respectively, for fiscal 2026. Over the medium term, the interest coverage and NCA/AD ratios are expected to be above 10 times and 90%, respectively.

Key Rating Drivers - Weaknesses

Exposure to intense competition in the compounds market and dependence on large players in the oil and gas industry for raw material

The domestic polymer compounds industry faces intense competition from imports made by global chemical giants such as Borealis AG and Dow Chemical Company. These players have large capacities and economies of scale, but mainly cater to specialty-grade compounds and are focused on high and extra-high-voltage power cables. The company procures 60–70% of its raw material from Reliance Industries Ltd ('Crisil AAA/Stable/Crisil A1+'), Indian Oil Corporation Ltd ('Crisil AAA/Stable/Crisil A1+') and ONGC Petro-additions Ltd, and has limited bargaining power with these suppliers.

Susceptibility to volatility in raw material prices and foreign currency rates

Raw materials used to manufacture polymer compounds, including low-density polyethylene (LDPE), high-density polyethylene (HDPE), and polyvinyl chloride (PVC) resin, are derived from crude oil, and a portion of these inputs is imported. Consequently, fluctuations in crude oil prices and forex rates could impact the cost of procurement and cause volatility in input cost and operating margin. The working capital cycle is managed prudently, supported by disciplined inventory control and procurement practices. Nevertheless, timely sourcing decisions, judicious inventory management and the ability to pass on a part of the cost hike to the customers, as and when feasible, will help mitigate the impact of volatility in raw material prices and forex rates.

Liquidity Strong

DPIL's liquidity profile remained strong in fiscal 2026, underpinned by sufficient cash accrual, robust profitability and a conservative capital structure. The company maintained an unencumbered cash surplus of Rs 59 crore as of March 31, 2026. Expected annual net cash accrual of Rs 200–300 crore should comfortably cover the planned capex over the medium term. Further, sanctioned working capital limit of Rs 759 crore was utilised at 31% on an average during the 12 months ended April 30, 2026, thus providing a sizeable buffer to meet operational requirements and unforeseen contingencies.

Outlook Stable

DPIL will continue to benefit from its strong market position in the domestic polymer compounds industry, diversified product portfolio, established clientele, and comfortable financial risk profile. Growth is likely to be supported by increasing focus on the cross-linked polyethylene segment, ramp-up of HFFR compounds, and robust demand from key end-user industries. Higher cash accrual driven by operational scale-up, coupled with the absence of significant capex requirement, should further strengthen its financial profile. The company's foray into the BESS segment is also expected to diversify and support revenue streams from fiscal 2028 onwards; timely project completion and successful commercialisation remain monitorable.

Rating sensitivity factors

Upward factors

- Sustained double-digit revenue growth, aided by increase in volume of HFFR/high-voltage segments and scale-up of BESS, while maintaining operating margin of 11–12%
- Sustenance of healthy financial risk profile via prudent capex funding and efficient working capital management

Downward factors

- Sluggish revenue growth impacting operating profitability (below 8%) and cash accrual on a sustained basis
- Debt-funded capex and stretched working capital cycle weakening the financial risk profile

About the Company

Incorporated in December 2020 by members of the Kolkata-based Surana family, DPIL houses the polymer compounds business of the Kkalpana group. In March 2022, Kkalpana Industries (India) Ltd received National Company Law Tribunal approval for demerging its compounds business into DPIL. Operations had commenced in 1985 with one unit in Daman for manufacturing PVC compounds. Sustained expansion has led to a diverse product portfolio, comprising PE and PVC compounds, masterbatches, engineering plastics and HFFR compounds. The company has five plants across West Bengal, Daman & Diu, Dadra & Nagar Haveli, and Noida and aggregate installed capacity of 233,400 TPA.

Note on complexity levels of the rated instrument:

Crisil Ratings' complexity levels are assigned to various types of financial instruments and are included (where applicable) in the 'Annexure - Details of Instrument' in this Rating Rationale.

Crisil Ratings will disclose complexity level for all securities - including those that are yet to be placed - based on available information. The complexity level for instruments may be updated, where required, in the rating rationale published subsequent to the issuance of the instrument when details on such features are available.

For more details on the Crisil Ratings' complexity levels please visit www.crisilratings.com. Users may also call the Customer Service Helpdesk with queries on specific instruments.

Please note:

More details including a list of activities or instruments, along with the names of respective financial sector regulators (FSRs) whose purview they fall under, is available in 'Annexure – List of Instruments and Names of Regulators' below.

Annexure - Details of Instrument(s)

ISIN	Name Of Instrument	Date Of Allotment	Coupon Rate (%)	Maturity Date	Issue Size (Rs. Crore)	Complexity Levels	Rating Outstanding with Outlook	Regulator Of Instrument

Annexure: List of instruments and names of regulators of the instruments

As required by SEBI CRA Circular dated Feb 10, 2026, a list of activities or instruments falling under the purview of various FSRs, along with the names of respective FSRs, is being disclosed below:

A. Rating activities

Sr. No.	Instrument / activity Name	Regulator of the instruments
1	Listed/Proposed to be listed bonds/debentures/preference share (all securities)	SEBI
2	Unlisted/Proposed to be unlisted Bonds/Debentures/ Preference share (all securities)	MCA
3	Listed PTCs / Securitisation Notes (originated by entities regulated by RBI)*	SEBI
4	Listed PTCs / Securitisation Notes (originated by entities not regulated by RBI)*	SEBI
5	Unlisted PTCs / Securitisation Notes (originated by entities regulated by RBI)*	RBI
6	Listed Commercial Paper and NCDs with original maturity less than 1 year	RBI
7	Unlisted Commercial Paper and NCDs with original maturity less than 1 year	RBI

8	Loan Facilities (Fund/Non-Fund Based) from Bank/NBFCs/NHB/FIs ^	RBI
9	External Commercial Borrowings and other similar borrowings	RBI
10	Certificates of Deposit	RBI
11	Fixed Deposits raised by NBFC's, Banks, HFCs, Fis	RBI
12	Fixed Deposits raised by corporates other than NBFCs, Banks, HFCs, Fis	MCA
13	Inter Corporate Deposits/Loans extended by Corporates	MCA
14	Borrowing programme ~	-
15	Issuer Ratings #	-
16	Credit Ratings for Capital Protection Oriented Schemes (by Mutual Funds and AIFs)	SEBI
17	Credit quality ratings (CQRs) for Mutual Fund Schemes and Schemes of AIFs	SEBI
18	Listed Security Receipts	SEBI
19	Unlisted Security Receipts	RBI
20	Independent Credit Evaluation (ICE)	RBI
21	Expected Loss Ratings (for Loan Facilities (Fund/Non-Fund Based) from Bank/NBFCs/NHB/Fis)	RBI
22	Expected Loss Ratings (Listed/Proposed to be listed bonds/debentures/preference share (all securities))	SEBI
23	Expected Loss Ratings (Unlisted/Proposed to be unlisted Bonds/Debentures/Preference share (all securities))	MCA
24	Unlisted PTCs / Securitisation Notes (originated by entities not regulated by RBI) *	Investor-side regulator such as IRDAI, PFRDA @

* Includes securitisation transactions involving assignee payout, acquirer's payout.

~ The rated instrument may involve issuance of different instruments such as debt securities (listed or otherwise), bank loans, commercial paper (listed or otherwise), etc. The regulator of the instrument may accordingly be SEBI, RBI or MCA and can only be determined upon issuance. In PRs subsequent to issuance(s), Crisil Ratings Limited shall separately capture the rated quantum details along with names of respective regulators.

^ Includes bank facilities such as liquidity facility, second loss facility that are part of securitisation transactions.

There is no instrument being rated and hence, Regulator of the Instrument is not applicable. The rating scale and definitions are being followed as stipulated in SEBI Master Circular for CRAs.

@ These ratings were assigned during regulatory regime prior to introduction of SEBI CRA Circular dated Feb 10, 2026 and the investor side regulators have accordingly been included.

Note: Kindly note that for activities or instruments falling under the purview of FSRs other than SEBI, the grievance/dispute redressal mechanisms and investor protection mechanisms provided by SEBI shall not be available.

About Crisil Ratings Limited (A subsidiary of Crisil Limited, an S&P Global Company)

Crisil Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

Crisil Ratings Limited ('Crisil Ratings') is a wholly-owned subsidiary of Crisil Limited ('Crisil'). Crisil Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").
